BellaVita™ System Feature

Customizing Treatment

By having three options of Filler, Solution and Filler+Solution, it is possible to adjust injector machine by choices of contents. BellaVita injector is capable to tailored treatment by adjustable and customizable options to inject exact depths and volumes.

Needle with Connectable Filter

Disposable suction filter can be coupled with multi needle (to prevent inflow of foreign objects) for sanitary treatment process.

Minimizes Drug Loss

To minimize drug loss, new technical program is applied and to have stronger torque and enhanced tolerance, motor is upgraded by Environmental BLDC motor on BellaVita injector.

Vacuum Control

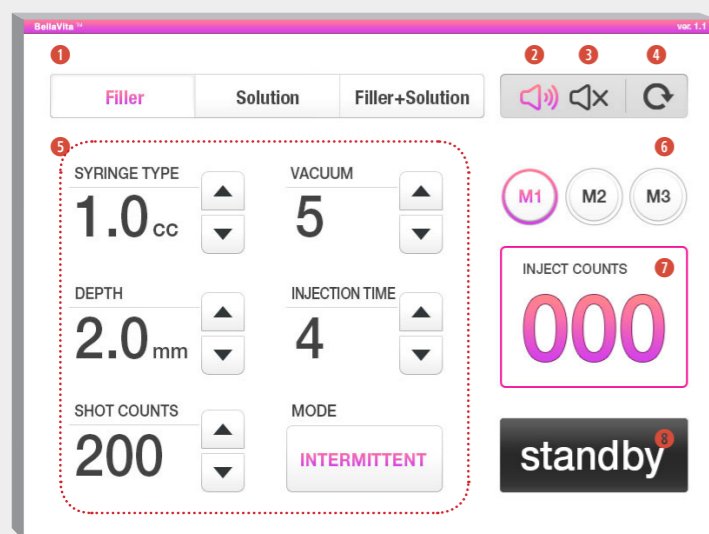

By low noise and high vacuum pressure design, it is more quiet and less bleeding compare to other injectors.

Simplicity of Use

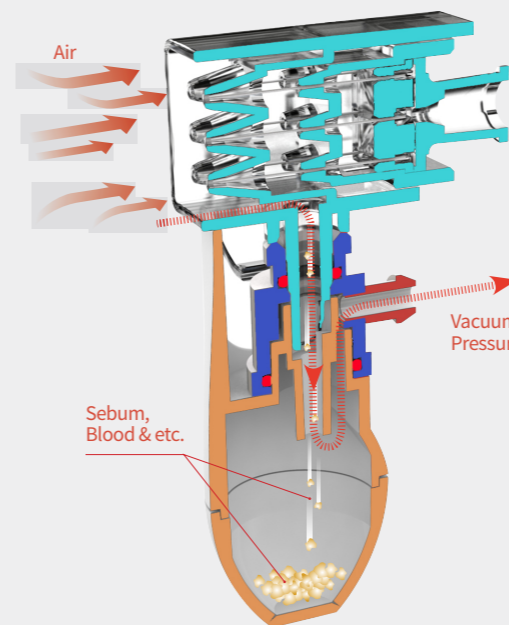

Increased main body LCD screen to enlarge additional functions to be used at the screen and reduced operation buttons at the gun to enhance convenience of surgical procedure.

10.4 inch Touch Screen Display in BellaVita™ I N J E C T O R

10.4" touch display panel, the biggest screen ever applied on meso gun, is applied on BellaVita injector to increase its visibility and simplicity of operation.

- 1 Mode (Filler, Solution, Filler+Solution)
