BellaVita Secret 3S/3N

BellaVita Secret, the safest filler for Women

1. Hybrid-Tri Technology

- By cross linking both monophasic and biphasic, its unique structure outstands. Due to its special production process, 3D arrangement of HA improved viscoelasticity.

2.

Differentiated safety

- High quality HA ingredient was used for safety issue.
- High technologized production progress minimized endotoxin level and protein content.
- Minimize BDDE residue amount by improving refining process to eliminate adverse effect.

3.

Mannitol added as antioxidant

- Mannitol was added as antioxidant to prevent degradation of gel oxidation and to extent its durability and effect longer.

4.

Convenience to use and satisfaction of patients

- Even sizes of gel particles make treatment more convenient.
- Containing lidocaine to reduce pain while treatment.
- Elasticity of gel increases lifting effect and satisfaction of treatment is high.

5.

Double sterilization process

- Minimize microbial contamination and other risks by double sterilization process.

Before & After
